We design, manufacture and deliver to our customers comfort reflected in our furniture, mattresses and components used to produce them.

We understand quality as meeting the requirements of our customers with the emphasize on the safety, functionality, ease of assembly and aesthetics of our products.

We work in effective and innovative way. As a result we offer attractive terms of cooperation to our customers.

The production of furniture and mattresses takes place in environmentally friendly conditions combined with opportunities provided by modern machinery park.

The furniture and mattresses produced in our company are the work of qualified employees for whom we want to be desirable employer. We care about development, health, satisfaction and safety of each of them.

We continuously improve our activities in all areas, while increasing our competitiveness and improving the efficiency of our processes.

Innovation, flexibility, development and investments are the driving force of our operation and thanks to them we create our competitive advantage, giving our clients confidence that the orders will be fulfilled in accordance with their expectations.

This policy is a support for the strategy development of our organization defined by the Owners and the Board.
